Question 1 Correct	Given a string, s , consisting of alphabets and digits, find the frequency of each digit in the given string.
Marked out of 1.00	Input Format
Flag question	
	The first line contains a string, <i>num</i> which is the given number.
	Constraints
	1 ≤ len(num) ≤ 1000
	All the elements of num are made of English alphabets and digits.
	Output Format

Question 2 Correct Marked out of 1.00 Friag question	Today, Monk went for a walk in a garden. There are many trees in the garden and each tree has an English alphabet on it. While Monk was walking, he noticed that all trees with vowels on it are not in good state. He decided to take care of them. So, he asked you to tell him the count of such trees in the garden. Note: The following letters are vowels: 'A', 'E', 'I', 'O', 'U', 'a', 'e', 'i', 'o' and 'u'.
	Input:
	The first line consists of an integer <i>T</i> denoting the number of test cases.
	Each test case consists of only one string, each character of string denoting the alphabet (may be lowercase or uppercase) on a tree in the garden.
	Output:
	For each test case, print the count in a new line.
	Constraints:
	$1 \le T \le 10$ $1 \le length of string \le 10^5$
	SAMPLE INPUT

```
JHklsnZtTL
SAMPLE OUTPUT
 Explanation
In test case 1, a and o are the only vowels. So, count=2
 Answer: (penalty regime: 0 %)
                                          #include <stdio.h>
                         2 + int main(){
                                                                           int t;
                                                                          scanf("%d",&t);
                          4
                                                                          while(t--){
                         5 +

Question 3 Correct	Given a sentence, s , print each word of the sentence in a new line.
Marked out of 1.00 ♥ Flag question	Input Format
	The first and only line contains a sentence, s.
	Constraints
	$1 \le len(s) \le 1000$
	Output Format
	Print each word of the sentence in a new line.
	Sample Input 0
	This is C
	Sample Output 0
	This
	is

Explanation 0

In the given string, there are three words ["This", "is", "C"]. We have to print each of these words in a new line.

Answer: (penalty regime: 0 %)

	Input	Expected	Got	
~	This is C	This	This	~
		is	is	

1 | #include <stdio.h>

Question 4 Correct	Input Format
Marked out of 1.00	You are given two strings, a and b , separated by a new line. Each string will consist of lower case Latin characters ('a'-'z').
	Output Format
	In the first line print two space-separated integers, representing the length of \boldsymbol{a} and \boldsymbol{b} respectively.
	In the second line print the string produced by concatenating \boldsymbol{a} and \boldsymbol{b} ($\boldsymbol{a}+\boldsymbol{b}$).
	In the third line print two strings separated by a space, a ' and b '. a ' and b ' are the same as a and b , respectively, except that their first characters are swapped.
	Sample Input
	abcd
	ef .
	Sample Output
	4 2
	abcdef
	ebcd af
	Explanation

```
a = "abcd"
b = "ef"
|a| = 4
|b| = 2
a + b = "abcdef"
a' = "ebcd"
b' = "af"
